

Reduces Friction, Heat and Wear

Advanced XPL+ technology creates an ionic bond with the metal in an engine, providing extraordinary protection from heat and friction, and reducing wear especially during start-up when motor oil is not yet circulating. From a lawnmower to a container ship, Engine Life Treatment will help extend an engine's working life and performance.

BOTTOM LINE BENEFITS:

- Helps increase engine life
- Withstands friction & high temperatures
- Prevents oxidation & corrosion
- Protects & conditions seals
- Extends oil change intervals
- Helps optimize engine performance and fuel economy
- Protects engine from wear during start-up

APPLICATIONS:

- Gasoline or diesel engines
- New or high mileage engines
- Auto, truck, marine, railroad, construction, off-road, motorcycle and small engines
- Compatible with petroleum or synthetic oils

DIRECTIONS

For 4-6 quart capacity engines pour 12oz into motor oil crankcase.
For larger capacity engines use at 10% by total volume.

PART NUMBER	SIZE	CASE PACK
11012	12oz	12
11001	1 Gallon	4
11005	5 Gallon pail	1
11055	55 Gallon drum	1
